3D ScanBook

The 3D ScanBook is the perfect solution for smaller objects and offers unparalleled mobility. No matter if ring or bracelet, hat or shoe, mobile phone or tablet. No matter if stationary in the studio or at your client's. The 3D ScanBook combines flexibility of use with maximum precision and reliability.

Whether you choose QuickCap for 360° scans on multiple axis or ScanWare for the creation of 3D objects with lifelike real textures, the 3D ScanBook is the right choice for your daily needs.

Interchangeable back panels and coatings of different colours adapt to the colour of your product to automatically knock out the background of your photos.
